On the right track

The new 48-volt system makes evenly illuminating rooms, setting accents, and providing excellent mood lighting a breeze. Click the desired inset, and you're ready to go. Choose between opal insets, spot insets, tracklights, and various suspended luminaires which can even work with indirect light. This delivers a great atmosphere in hotels, restaurants, bars or shops, and in private homes. The individual versions, available in black or white, can be controlled from the comfort of your mobile device.

Download the iOS App for setup and control from the AppStore and start dimming.
