aluminium powder coated

Light Colour 2700K | 3000K

SOME THINGS JUST LEAVE TRACES.

There are designs that do not pass you by without making an impression. Like the finely grooved surface of TRACE, which gives this minimalist light fitting its very own character. Where is this effect best brought to the front? On large wall surfaces, which TRACE skilfully highlights with one or two light cones. And it comes in a variety of colours that provide wonderful contrasts, especially on modern material surfaces.
