PRETTY COOL – THE NEW ONE

Are you always catching yourself glancing at it? We can
understand that. After all, ROOMOR Office is anything but an
ordinary office light. It fits perfectly into modern co-working
spaces where unconventional design and maximum flexibility
are in demand. How does ROOMOR Office do this? With three
different versions and two light colours that can be set at will.
Choose ROOMOR Office with an opal cover for soft, uniform
room lighting. For wide-area work lighting, go for the version
with the microprismatic cover. It is also ideal for computer
screens. By the way, ROOMOR Office perfectly matches all
other ROOMOR series lights. It has never been so easy to get
that trendy industrial style for the entire office.
