NEW PRODUCTS DECO

WEVER & DUCRÉ
LIGHTING

MICK

RIGHT UP MY STREET

- Clear, geometric forms just like the Bauhaus style
- Maximum reduction with an architectural structure
- Designer Serge Cornelissen
- The highlight is the golden inner tube and clear faceted lens
- Exact, sharp edges, retractable joints give the lamp and the rooms a special character
- RED DOT Design Winner

reddot winner 2020

CEILING SURFACE | WALL SURFACE

DESIGNER

SERGE CORNELISSEN

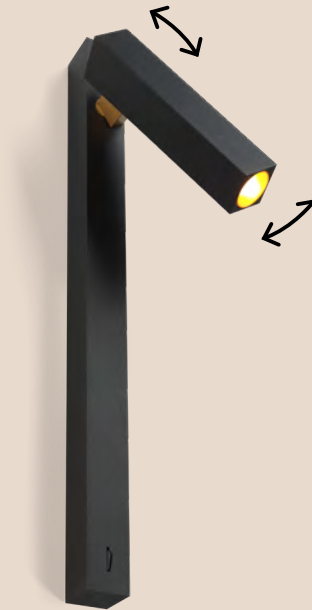

- More than 20 years of experience in the design of architectural lighting products
- Started his career as an architect
- His background has led to a great understanding of what is the role of lighting solutions in their architectural contexts
- The designs are based on the newest led technology
- Besides aesthetics, his concept include lighting-technical innovation

MICK SNOOZE

RIGHT UP MY STREET

- No visible screws, minimal switch
- Can be swiveled into various positions, enables a glare-free and pleasant illumination as a bed lamp especially in the hotel

RUVI

ALL SYSTEMS GO

- New interpretation of the classic “light bulb”
- Semi-recessed luminaire with conventional E27 base allows the use of a variety of lamps

CEILING RECESSED

RUVI

ALL SYSTEMS GO

- The hidden lamp carrier results in an exciting ceiling appearance
- Ideal for restaurants, bars, hotels
- The massive supporting ring creates a rough industrial look

RUVI 1.0 | CEILING RECESSED

SCAVA

SHINE A LIGHT UPWARDS

- Simple bowl shape with the timeless elegance of the 1920s Art Deco years
- Seemingly floating bowl on minimalistic holder
- Two different light colors extend the variety of possible applications
- Up-light with uniform indirect light distribution with a lot of light comfort
- Indirect light creates an inviting feel-good atmosphere that is particularly good for restaurants, hallways or waiting areas

WALL SURFACE

SCAVA 1.0 | WALL SURFACE

SCAVA 1.0 | WALL SURFACE

FINLIN

FOLLOW THE LINE

- Delicate wall light for individual light art - whether for private or in public spaces
- Inspired by aesthetic light artists such as Dan Flavin
- The modern LED technology allows always smaller, floating, wafer-thin aluminum tubes that are almost weightless in the room and seem to float
- The reduction of the lamp body par excellence
- Can be combined to 4 model variants - because of staggered heights lines of light can overlap

WALL SURFACE

FINLIN 3.0 | 4.0 | WALL SURFACE

BLIEK PETIT

I'LL BE WATCHING YOU

- Swiveling recessed spot with independent Lamp head
- The flattened curve includes the leading swiveling and rotating mechanism
- The black inner tube ensures high visual comfort
- For even more glare reduction optional honeycombs are available
- Illumination of accents in all areas without major intervention in the architectural concept
- Various color combinations are available
- Low installation depth (60mm)
- Can be combined with the big brother BLIEK round and the DEEP spotlight family
- Structure of the CENO version

BLIEK ROUND | SQUARE

I'LL BE WATCHING YOU

- Big brother with 51mm head diameter
- Square version available
- In addition to LED Engine also GU10 for the inexpensive version
- Provide even more glare control with optional honeycombs
- Illumination of accents in all areas
- Various color combinations available
- Can be combined with the little brother BLIEK petit and the DEEP or PLANO spotlight family following the Wever & Ducré philosophy - design families to combine with one another to create uniform projects

BLIEK SQUARE 1.0 | CEILING RECESSED

SWAM

LET IT GROW

- Elegant outdoor lamp with sculptural character
- Organically SWAM seems to bend in the wind
- Alternative also available with a straight base
- Luminaire heads with direct and indirect light distribution - particularly classy with optional golden internal reflector
- Modular luminaire with earth spikes for the modern flower bed or between plants
- Used as wall lamp, an eye-catcher also on the inside
